Send as Email Message

Press the forward to email button on the card - see below.

The following window will open up:

A screenshot of a WhatsApp chat interface on a mobile device. The status bar at the top shows "WhatsApp", signal strength, "4G", and the time "09:17". The chat header shows "Cancel", the contact name "Majella Phelan", and "Send". The message area contains a "To:" field with a cursor, a "Cc:" field with the email "cards@supadata.net", and a "Bcc:" field. The subject line is "Subject: Majella Phelan". The message body says "This Is A Link For Majella Phelan From Smart Card" followed by the URL "https://www.supadata.net/cards/Smart_Card_Majella_Phelan_25494.asp". At the bottom, it says "Sent from my iPhone" above a standard QWERTY keyboard.

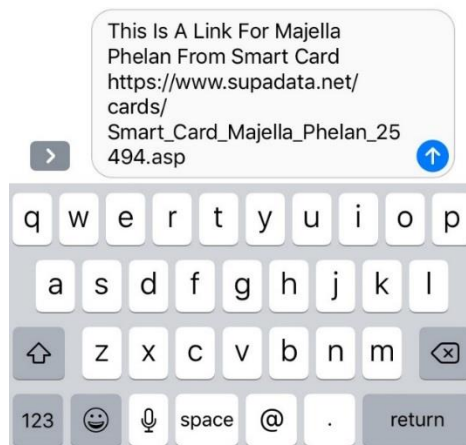

Send as SMS Message

The following window will appear.

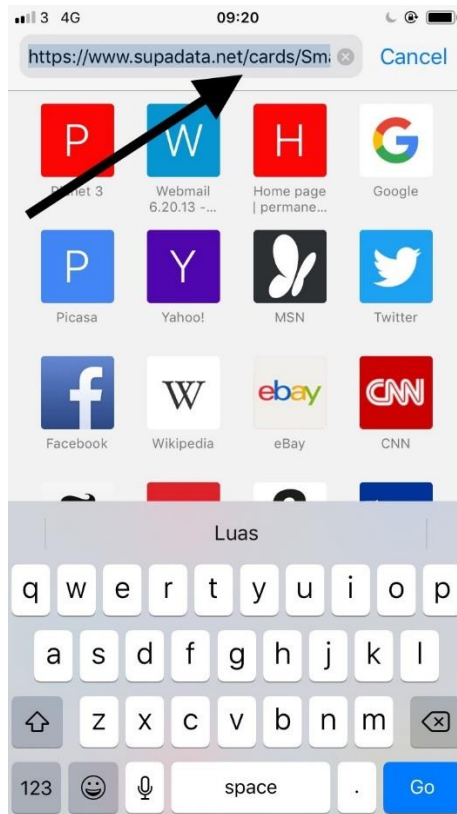

Type in name or number of the person to send in the “to” field and hit the blue send arrow.

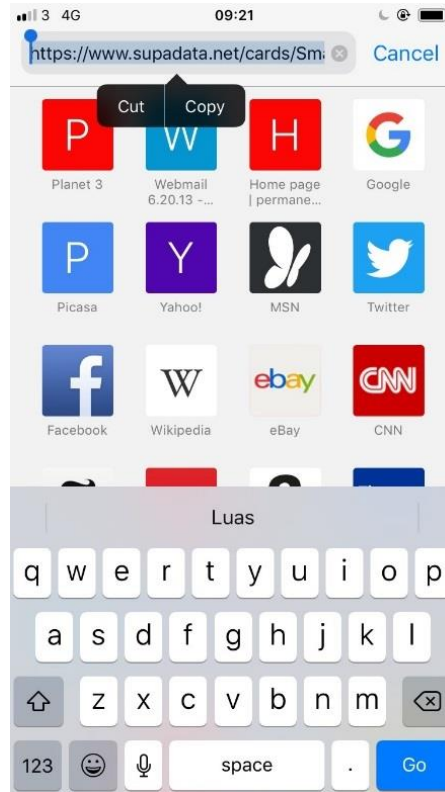

Send using Phone's Methods

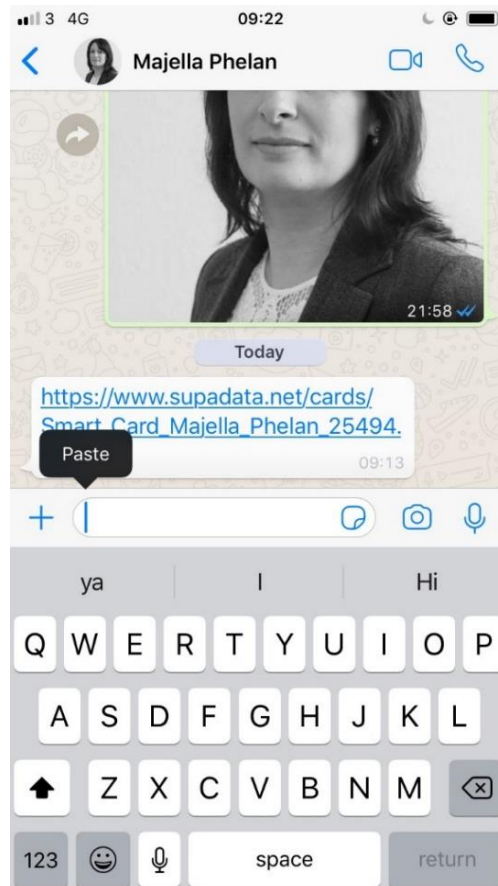

URL Link of the Smart Card

Press and hold down on the url link at the top of the smart card and then let go. The cut/copy buttons will appear as below. Press the copy button.

Paste into email, text message or WhatsApp by going into one of those applications on your phone, then pressing and holding down on the area where you would usually type. See image below.

The word paste will appear, press it, hit send and the link will appear (as if by magic) 😊

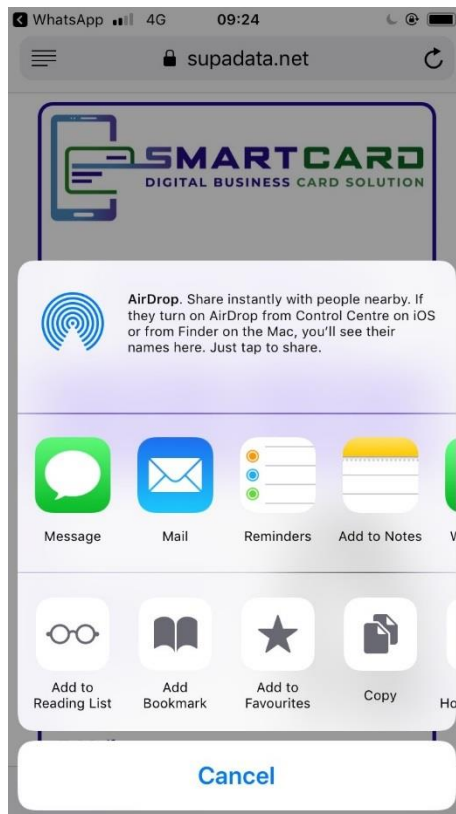

iPhone Device Share

Using the forward button at the bottom of the screen on the iPhone

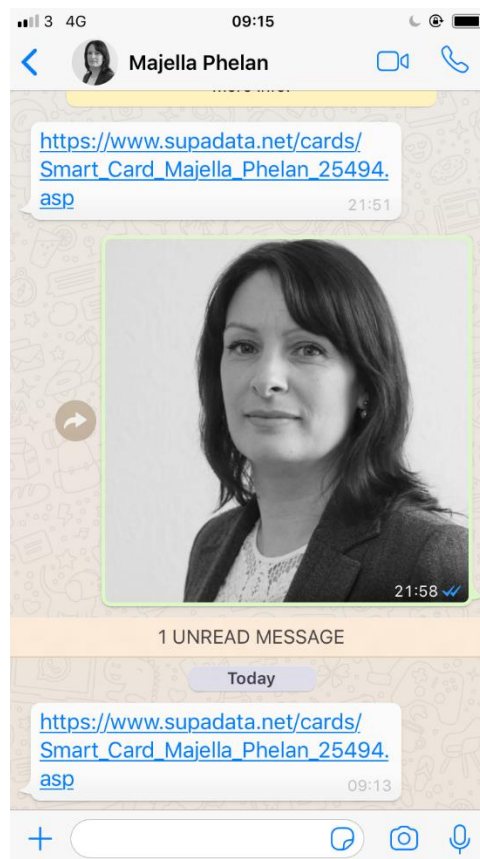

When you press this, the following icons will appear. Press the method of sending that you wish. We recommend email as this means you build up a database which helps with sales.

Receiving the Smart Card

A link will appear when you receive a smart card whether it's email, text or WhatsApp. See image below of WhatsApp.

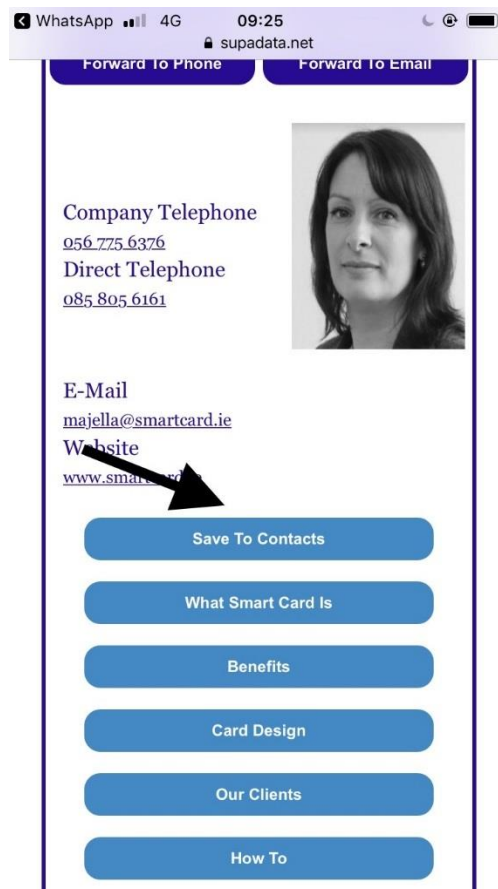

Once you click on the link in the message it will open the url of the smart card on your phone. From here you can save the card directly to your contacts by pressing Save To Contact button on the Smart Card.

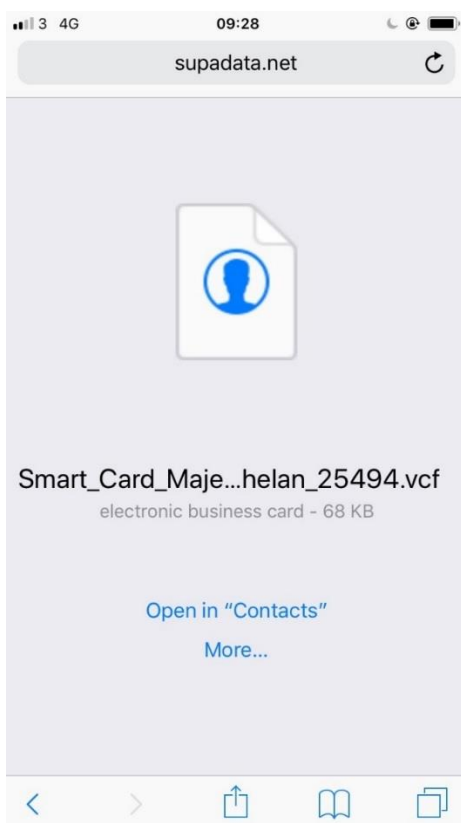

Saving the Smart Card

The first button at the top of every Smart Card is the **Save To Contacts** button as you will see below.

Touch this button to save to your phone.

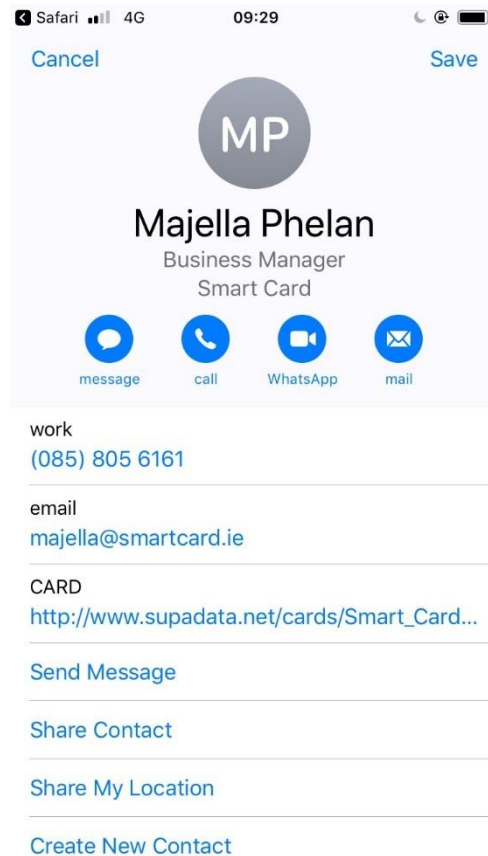

The following image will appear. At the bottom of this image, you can press the Open in Contacts text in blue.

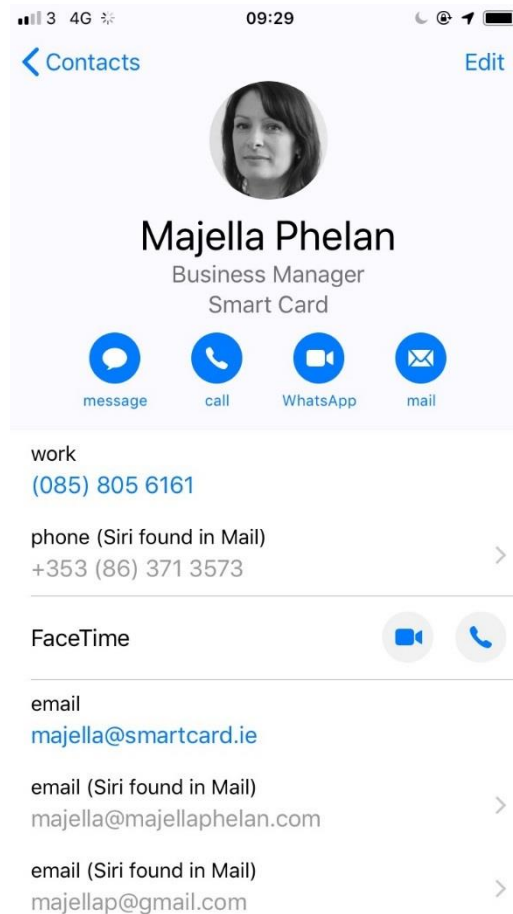

The following image will appear

Press save on the top right corner.

The Smart Card will appear in your contacts as follows, once saved.

The Smart Card can be accessed from the contacts button on your phone from now on.

You can also save it to your home screen if you wish. This helps with easy access when you want to share it with others. We recommend saving your Smart Card to your home screen.

Saving the Smart Card to home screen

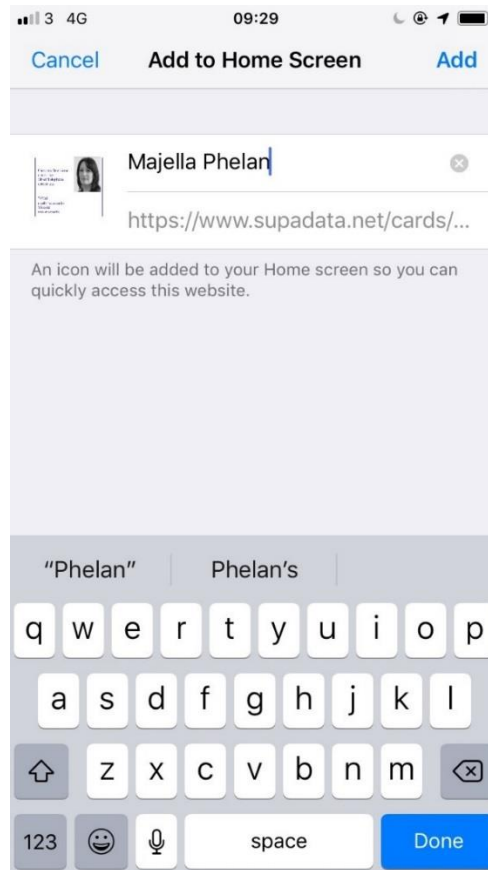

Click on the forward to button as outlined in black above. The following image will appear. If you don't see "Add to Home Screen" swipe the buttons at the bottom from right to left and it will be there.

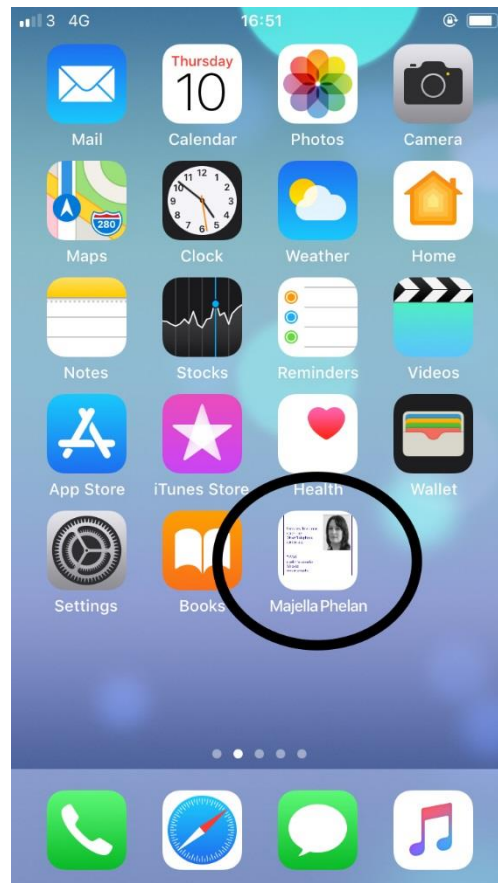

Add to Home Screen

Click Add once you see the following message

The Smart Card will appear as an image of your business card with name underneath which you can access anytime by tapping on the icon on your home screen
